

**DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING
SHARDA SCHOOL OF ENGINEERING AND TECHNOLOGY
SHARDA UNIVERSITY, GREATER NOIDA**

**MentorLink – Automated Group Allocation and Report Summarization
Using NLP**

**A project submitted in partial fulfillment of the requirements for the
degree of Bachelor of Technology in Computer Science and Engineering**

by

Umang (2201010761)

Abhishek Yadav (2201010026)

Adarsh Lakhanpal (2201010033)

B-Tech CSE (AI & ML)

Supervised by:

Ms. Smita Tiwari, Assistant Professor (Guide)

Mr. Shushant Jhingran, Assistant Professor (Co-Guide)

MARCH, 2026

CERTIFICATE

This is to certify that the report entitled “MentorLink – Automated Group Allocation and Report Summarization Using NLP” submitted by “Umang (2201010761), Abhishek Yadav (2201010026) and Adarsh Lakhanpal (2201010033)” to Sharda University, towards the fulfilment of requirements of the degree of “Bachelor of Technology” is a record of bonafide final year Project work carried out by them in the “Department of Computer Science & Engineering, Sharda School of Engineering and Technology, Sharda University”. The results/findings contained in this Project have not been submitted in part or full to any other University/Institute forward of any other Degree/Diploma.

Signature of the Guide

Name: Ms. Smita Tiwari

Designation: Assistant Professor

Signature of Head of Department

Name: Prof. (Dr.) Sudeep Varshney

Place: Sharda University

Date:

Signature of External Examiner

ACKNOWLEDGEMENT

A major project is a golden opportunity for learning and self-development. We consider ourselves very lucky and honored to have so many wonderful people lead us through the completion of this project. First and foremost, we would like to thank Dr. Sudeep Varshney, HOD, CSE who gave us an opportunity to undertake this project. Our grateful thanks to Ms. Smita Tiwari for her guidance in our project work. Ms. Smita Tiwari, who despite being extraordinarily busy with academics, took a timeout to hear, guide and keep us on the correct path. We do not know where we would have been without her help. CSE department monitored our progress and arranged all facilities to make life easier. We choose this moment to acknowledge their contribution gratefully.

ABSTRACT

MentorLink is a backend system made to help colleges manage student projects more easily. It automatically forms student groups and assigns faculty mentors using artificial intelligence. This system removes manual work, saves time, and makes the process fair for everyone. The project uses Spring Boot (Java) for backend development and MySQL as the database. The administrator uploads Excel files containing student and faculty details, and the system reads these files using Apache POI. It then uses cosine similarity to group students who have similar skills and assigns a faculty mentor based on expertise and workload. MentorLink also uses GitHub authentication for safe and verified login. The backend has been fully developed and tested using Postman. Frontend and report analysis parts will be added later in future versions.
